Confirmation

We like to confirm that Mr. Lukasz Krysmalski, born on [redacted], resident in [redacted] was employed as a Trainee from February 16th, 2026 to June 15th, 2026 in our company in the center Digital Safety & Security, competence unit Cyber Security and Communication Technologies.

Under the guidance by his supervisor he was able to gain practical experience within following tasks:

- Protocol Fuzzer Development for UAV Communication (Rust)
  - Design and implementation of a fuzzer in Rust targeting the Crossfire (CRSF) drone communication protocol, with the goal of systematically discovering protocol-level vulnerabilities
  - Activ participation in designing the software architecture of the fuzzer, ensuring modularity, extensibility and maintainability
  - Implementation of core fuzzer components, including observers, mutation operators, input generators and protocol drivers
  - Development of unit and integration tests to validate correctness of individual components
  - Maintaining a CI/CD pipeline to enable reproducible builds across the development lifecycle
- Auxiliary Software for the UAV Security Testbed Suitcase
  - Development of an auxiliary tool to support the operation of a portable drone security testbed
  - Implementation of the programmatic power cycling of testbed components, enabling automated control over device startup and shutdown sequences required for repeatable security experiments

Mr. Lukasz Krysmalski completed the tasks assigned to him to our utmost satisfaction.

He was cherished by his superiors and colleagues in equal measure.

We wish Mr. Lukas Krysmalski all the best and much success for his personal future.

Yours faithfully

AIT Austrian Institute of Technology GmbH

Helmut Leopold
Prokurist (AIT)
